

RGB Controller LT-330-8A

Brief introduction

Model LT-330-8A is a powerful multi-functional RGB controller. using PC engineering plastic housing, with 8 light touch function keys, build-in 25 changing modes, adjustable brightness & speed. With the three Specially designed RGB knob potentiometer, color mixing becomes unprecedented simple and convenient .Besides, the three specially treated knob could realize depth dimming, compared with other controllers, it could mix bright vivid color, mixing the true color that users want.

Performance Features

- After going through a special dimming process treatment, the three knob could mix bright vivid color.
- RGB per channel 1024 grey level; delicate, soft and flicker-free colorful gradients.
- build-in 25 fantastic modes such as colors jump changing, gradual changing, horserace, strobe etc.
- adjustable brightness & speed with the suspension function.

Product parameter

LT-330-8A RGB Controller

Input voltage	DC5V~DC24V
Max current load	8A x3CH Max 24A
Max output power	120W/288W/576W(5V/12V/24V)
Function Mode	25 modes
working temperature	-30°C~55°C
Dimension	L170×W64×H44mm
Package Size	L173×W67×H47mm
Weight (G.W)	200g
