Easy installation. No trenching and cabling. Money saver.

Nobody does lighting quite the way SensLights does, which has championed the use of LEDs in everything from domestic bulbs to its versatile Hue smart lighting. Its solar lights are brighter than most rivals and come in various styles such as downward-facing posts, upward-facing lights and more industrial wall-mounters.

This wall light has a big solar panel on top, meaning you get more light for longer from the LED for a good six hours. It's simple to set up and has great build quality. You can also choose a version with a built-in motion sensor. Strong enough to easily see if that's an olive or a beetle in your salad.
